

[www.energyinst.org/training](http://www.energyinst.org/training)  
**EI oil and gas training**  
**distance learning 2016**

**Level 1: Introductory** - 20 units (each taking some 2 to 3 hours to complete) covering all sectors of the industry consisting of slide presentations. For details see:

<https://www.energyinst.org/training/oil-gas-training/IntroductionLevel>

Take 16 modules and successfully answer a question on each completed module to gain an Energy Institute certificate

**Module titles:**

- |                        |                                |                              |                                |
|------------------------|--------------------------------|------------------------------|--------------------------------|
| 1. Resources           | 6. Portfolios                  | 11. Exploration techniques   | 16. Fiscal designs             |
| 2. Organizations       | 7. LNG                         | 12. Drilling                 | 17. Project management         |
| 3. Subsurface systems  | 8. Uncertainty                 | 13. Well logging and testing | 18. Transport and storage      |
| 4. Natural gas         | 9. Petroleum economics         | 14. Enhanced recovery        | 19. Refining / petrochemicals  |
| 5. Upstream facilities | 10. Acquisitions / divestments | 15. Safety / Environment     | 20. Community / sustainability |

**Level 2: Intermediate** - Oil and gas industry insight for career development . 4 units (each taking some 20 hours to complete) consisting of text, diagrams, videos, learning tasks and web links. For details see:

<https://www.energyinst.org/training/oil-gas-training/Level2OilandGasCareerDevelopment>

Take all 4 modules and successfully complete a multiple choice test to gain an Energy Institute certificate

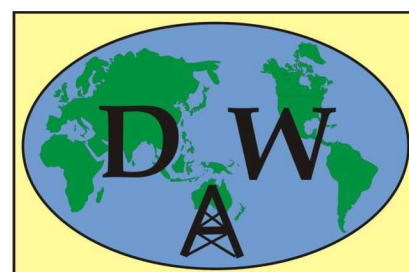

**Module titles:**

**Module 1: Supply Chains, Organisations and Markets**

**Module 2: Upstream - Exploration and Production**

**Module 3: Natural Gas Production and Processing**

**Module 4: Midstream and Downstream Oil Sectors**
